

## Safety Barriers – Swimming Pools and Spas

### What is a safety barrier?

A safety barrier means the assembly of components natural or otherwise, which form the intended barrier to the pool, exclusive of gates or door sets. The safety barrier includes items such as posts and panels, constructed or natural walls, sides of buildings, child resistant windows, and balustrades on a balcony, where they form part of the intended barrier.

### What can I build?

The design and construction of safety barriers must comply with requirements of the [Australian Standards AS1926.1-2012](#). Safety barriers can be constructed using any materials providing they are durable and they comply with the standards. The minimum requirements of a safety barrier and gate are:

- minimum height of 1200mm;
- maximum 100mm from ground level;
- maximum vertical gaps of 100mm;
- gate must open outward from pool and/or spa;
- gate must be self-closing;
- latch must be at least 1500mm from ground level.

### Do I need a Building Permit?

Under building legislation in WA, it is compulsory to obtain a Building Permit prior to the installation of any new swimming pool or spa safety barrier.

### How long does it take to get a Building Permit?

The *Building Act 2011* sets time frames in which the Shire of Boddington has to assess and determine an application for a Building Permit. The applicable timeframe depends on whether the building application is Uncertified or Certified.

It is important that you are aware of allowed time frames prior to lodging your application and that your application documentation is complete at the time of submission.

Should further information be required by the Shire of Boddington in order to assess the building application, the applicant may be given up to 21 calendar days in which to provide the outstanding information. If the information is not received within the 21 days, the application may be refused unless mutual consent has been granted for a further 21 days.

### Uncertified Building Applications

An Uncertified Building Application can be submitted for Class 10 structures such as swimming pool or spa safety barriers.

The Shire of Boddington has up to 25 business days from the date of lodgement to assess the application and issue a Building Permit. The required Certificate of Design Compliance will be issued by the Shire of Boddington as part of the application process.

### Certified Building Applications

A Certified Building Application can be submitted for all Classes of structure.

Prior to lodging a Certified Building Application to the Shire of Boddington, a private Building Surveying Practitioner would need to be engaged to issue a Certificate of Design Compliance.

The Shire of Boddington has up to 10 business days from the date of lodgement to assess the application and issue a Building Permit.

### How long until my permit expires?

A Building Permit is generally valid for two years from the date on which it was granted.

If more time is required to complete the building works, you can apply for an extension of time of up to a further six months by making a formal application and paying the prescribed fee.

### What happens when I have completed my building works?

The nominated builder on the Building Permit must submit a Notice of Completion BA7 form to the Shire of Boddington within seven days and an inspection must be conducted before swimming pool or spa can be filled with water.

## Building Application Checklist – Safety Barrier

### BA2 – Uncertified Application

		Attached
