

Dwellings

What is a dwelling?

A dwelling is a building or portion of a building being used, adapted, designed or intended to be used for the purpose of human habitation on a permanent basis by a single person, a single family or no more than six persons who do not comprise a single family.

What can I build?

The Building Code of Australia (BCA), together with the Shire of Boddington's Town Planning Scheme and adopted policies, has specific minimum requirements relating to the construction and location of dwellings.

The BCA is complex and advice regarding the design of your proposed dwelling should be sought from your Architect or registered Building Surveyor.

Do I need a Building Permit?

The *Building Act 2011* states that any new dwelling, additions and structural alterations to a dwelling require a Building Permit.

A Building Permit may not be required for the renovation, alteration, improvement repair or maintenance of a building or incidental structure, providing the building work will not adversely affect the structural soundness of the building or incidental structure

How long does it take to get a Building Permit?

The *Building Act 2011* sets time frames in which the Shire of Boddington has to assess and determine an application for a Building Permit. The applicable timeframe depends on whether the building application is Uncertified or Certified.

It is important that you are aware of allowed time frames prior to lodging your application and that your application documentation is complete at the time of submission.

Should further information be required by the Shire of Boddington in order to assess the building application, the applicant may be given up to 21 calendar days in which to provide the outstanding information. If the information is not received within the 21 days, the application may be refused unless mutual consent has been granted for a further 21 days.

Uncertified Building Applications

An Uncertified Building Application can be submitted for Class 1 structures, such as a dwelling.

The Shire of Boddington has up to 25 business days from the date of lodgement to assess the application and issue a Building Permit. The required Certificate of Design Compliance will be issued by the Shire of Boddington as part of the application process.

Certified Building Applications

A Certified Building Application can be submitted for Class 1 structures, such as a dwelling.

Prior to lodging a Certified Building Application to the Shire of Boddington, a private Building Surveying Practitioner would need to be engaged to issue a Certificate of Design Compliance.

The Shire of Boddington has up to 10 business days from the date of lodgement to assess the application and issue a Building Permit.

How long until my permit expires?

A Building Permit is generally valid for two years from the date on which it was granted.

If more time is required to complete the building works, you can apply for an extension of time of up to a further six months by making a formal application and paying the prescribed fee.

What happens when I have completed my building works?

The nominated builder on the Building Permit must submit a Notice of Completion BA7 form to the Shire of Boddington within seven days.

Building Application Checklist - Dwelling

BA2 – Uncertified Application

		Attached
